

**Panasonic**  
MARINE VHF RADIOTELEPHONE  
MODEL NO. **KX-G2200A**

## Operating Instructions

Please read before use.

# Introduction

Thank you for purchasing the Panasonic Marine VHF Radiotelephone.

The Panasonic model KX-G2200A is FM/VHF radiotelephone transceiver designed to work in the 156.025 to 163.275 MHz frequency range.

## Features

- International, USA, Canadian and Weather channels.
- All Memory channels and up to 5-years memory backup.
- Dual Watch: channel 16 and another channel.
- Triple Watch: channel 16, programmed Triple Watch channel and another channel.
- Scanning channel search.
- Overriding low output power on specific channel (CH13 and CH67 in USA mode.)

## CAUTION

A valid STATION and OPERATOR'S LICENSE are required BEFORE you can operate a MARINE VHF TRANSCEIVER.

## SPECIFICATIONS

### ● General

Number of Channels; .....	All International, USA and Canadian channels All Memory channels 10 Weather channels
Temperature range; .....	-20°C to +50°C (-4°F to +122°F)
Channel spacing; .....	25 KHz
Power Supply; .....	13.8 Volts DC ( $\pm 20\%$ )
Antenna impedance; .....	50 ohms
Channel memory back up; .....	5 years with an internal Lithium Battery
Size; .....	55 mm (H) $\times$ 140 mm (W) $\times$ 180 mm (D) (2 3/16" (H) $\times$ 5 1/2" (W) $\times$ 7 1/16" (D))
Weight; .....	950 g (2.09 lbs.)
Current; .....	receive     standby; 500 mA with full audio output; 1 A transmit     low output; 1.5 A high output; 5 A

### ● Receiver

Frequency range; .....	156.025 - 163.275 MHz
Sensitivity; .....	less than 0.3 $\mu$ V for 12 dB SINAD
Squelch sensitivity; .....	threshold; 0.12 $\mu$ V
Audio output; .....	4W at 10% distortion to 4 ohms speaker
Frequency stability; .....	$\pm 0.001\%$

### ● Transmitter

Frequency range; .....	156.025 - 157.425 MHz
Maximum Deviation; .....	$\pm 5$ KHz
RF output power; .....	High 25 W, Low 1 W
Spurious & harmonics emission; .....	spurious emission; 65 dB below carrier harmonics emission; 60 dB below carrier
Audio distortion; .....	less than 5%
Frequency stability; .....	$\pm 0.001\%$

## OTHER INFORMATION

### ● Back up battery for memory

To retain the programmed channels in memory a built-in battery for back up is provided. If the programmed channels are lost in the memory channel mode after turning your radio on, the built-in battery must be replaced with new one at a Panasonic Servicentre.

**NOTE:** This special battery is NOT User Replaceable.

### ● Dead Spot

Transmission and reception may be difficult from some locations, due to outside influences. If this happens, move to another location if possible.

# Precautions

The unit should not be mounted where it will receive direct sunlight for long periods of time.

Even though the KX-G2200 was designed for the marine environment, for long, reliable operation, mount the unit where it will not be splashed with water. Also, protect the unit from exposure to salty sea water.

This unit will develop heat in operation. This is a normal condition. Select a mounting location where the unit will be well ventilated.

Only use an antenna designed for VHF Marine radio service. Install it according to the manufacture's instructions and make sure that the connections are secure.

Your Marine VHF radio is designed to operate from a 13.8 volts DC source,  $\pm 20\%$  (12V Battery). Power supplies beyond these limits will cause improper operation and damage to the unit. Check the battery voltage often.

Do not use benzine, thinner, or the like, or any abrasive powder to clean the cabinet. Wipe it with a soft cloth.

# Installation

## UNPACKING

1. Carefully remove the KX-G2200 from the packing carton.
2. Examine the KX-G2200 for signs of shipping damage.
3. Accessory, hardware, cords, etc. are packed with the KX-G2200.  
Make sure you have removed all equipment and parts before discarding the packing material.
4. Notify the your specified authorized servicenter or dealer immediately, stating full details, should any damage be apparent.

## ACCESSORIES

Hand Mic ..... one

Mounting bracket ..... one

Mounting bolts ..... four  
Mounting screws ..... four  
Mounting washers ..... eight  
Mounting nuts ..... four

Mounting bracket bolts ..... two

Microphone hanger ..... one  
Microphone hanger screws ..... two

Power cord ..... one

# Installation (cont.)

## MOUNTING

Choose an appropriate location for mounting your marine radiotelephone. This location should be away from direct sunlight and water spray.

- ① Mount the bracket firmly to the mounting surface using the mounting bolts and nuts, or screws. (Refer to the TEMPLER.)

- To mount to a metal or fiberglass surface, use bolts and nuts.
- To mount to wooden surface, use screws.

- ② Secure the KX-G2200 into the mounted bracket using the two mounting bracket bolts.

Vary installation angle for best visibility.

- ③ Connect the power cord to the unit, and wire the cord to the vessel's battery by connecting the RED wire to the positive terminal (+), and the BLACK wire to the negative terminal (-).

If you find this cord too short, use the following guide to select the proper gauge wire to extend the supplied power cord.

- Up to 3 m (10 feet) - #14 AWG
- Up to 6 m (20 feet) - #12 AWG
- Up to 9 m (30 feet) - #10 AWG
- Up to 12 m (40 feet) - #8 AWG

Connect your antenna cable.

Any VHF marine antenna (must have a PL259 connector) of good quality and 50 ohms impedance will suffice, but the use of a gain antenna is recommended. Follow the antenna manufacturer's directions exactly. For an existing antenna, be sure that all connections are corrosion free and that all are firmly seated.

- ④ Connect the Hand Mic.

- If you wish to install this unit into a cabinet or console an optional Panasonic flush mounting kit, KX-G20, will be required.

# Installation

## Connecting Optional Equipments

You may increase the KX-G2200's utility by installing a external horn speaker.

---

## FUSE REPLACEMENT

If the in-line fuse of the power cord has blown, change it with the new one.  
If it blows again, have your unit checked.

- **To remove the fuse;**

Press the fuse holder and while keeping it pushed in, turn it as shown.

- **To install the fuse;**

Reverse the above procedure.

Use a fuse (8 A).

## ACCESSORY ORDER INFORMATION

Replacement parts and accessories are available through your local authorized parts distributor.

Part No.	Description	Colour
KX-G20	Flush Mounting Kit	Black

### Installation with KX-G20

For further details, see the instructions of KX-G20.

# Control Functions

- The meaning of “( )” is the lower function.  
To select this lower function, press the Function button first.

## LCD-Liquid Crystal Display

Displays: Operating Channel Transceiver modes

## Scan (TRI) Button

Selects: Scan (normal) — International, USA and Canadian channels  
Time Scan — WX Channel  
Memory Channel

### (TRI)

Selects: Triple monitor mode which monitors the displayed channel, CH16 and programmed Triple Watch channel.

## Channel Up Button

By pressing or holding this button, the operating channel number is increased.

## Channel Down Button

By pressing or holding this button the operating channel number is decreased.

## WX (U/I/C) Button

Selects: Weather mode.

When activated, weather channels (1-10) may be selected.

### (U/I/C)

Selects: International (INTL), USA or Canada (CAN) operating frequencies.

## H/L (DIM) Button

Selects: Transmit power mode, High - 25 Watt for long distance communication  
Low - 1 Watt for local communication

### (DIM)

Turns ON/OFF the LCD light.

The diagram shows a control panel for a radio. On the left, there are three buttons labeled 'FUNC', 'MEMORY', and 'CLEAR'. To the right of these buttons are two knobs: 'SQUELCH' with 'MIN' and 'MAX' markings, and 'VOLUME' with 'POWER OFF' and 'MAX' markings. Below the knobs is a circular microphone connector with four pins, labeled 'MIC'. Callout lines connect these features to descriptive text on the right side of the page.

### CH16 (DUAL) Button

Selects: CH16 immediately.

**(DUAL)**

Selects: Dual monitor mode which monitors the displayed channel and CH16.

### Function Button

Is used to select all secondary functions.

### Memory Button

Selects: Memory mode.

Stores and deletes channels, in memory.

### Squelch Control

Adjusts squelch control.

### Volume Control/Power Switch

Controls ON/OFF power and receiver volume.

### Microphone Connector

### Clear Button

Cancels all secondary functions and memory program mode.

It will not cancel the U/I/C operation modes.

# LCD (Liquid Crystal Display)

USA	Shows USA mode.
INTL	Shows International mode.
CAN	Shows Canadian mode.
WX	Shows Weather mode.
Channel Display	Displays the channel in use.
HI	Shows the High Power (25 Watt) mode.
LO	Shows the Low Power (1 Watt) mode.
SCAN	Shows unit is in Channel Scan mode.
T-SCAN	Shows unit is in the Time-Scan mode. Scanning starts again automatically even if a signal exists.
DUP	Shows that the unit is in the Duplex mode.
MEMO	Shows that the unit is in the Memory mode. Only memorized channels are shown.
M	In INTL, CAN, USA and WX modes, shows that the displayed channel has been memorized. It is possible to set or reset the desired channel in Memory.
DUAL	This function allows periodic checking for activity on CH16 while receiving another channel.
TX	Shows that the unit is transmitting.
	Shows that the Function button has been pressed. For six seconds after pressing the Function Button, the Secondary Functions of each button are available.
--	Shows that the Channel Memory is empty. (no channels have been memorized.)
▶ DUAL	Shows that the Triple Watch is on.
▶	Shows that the displayed channel is on program of Triple Watch channel.

# How to Use Double Function Buttons

<b>CH16</b>	Press <b>CH16 (DUAL)</b> to select upper function (e.g. --- CH16).
<b>DUAL</b>	Press <b>FUNC</b> then <b>CH16 (DUAL)</b> to select lower function (e.g. --- DUAL).

## HOW TO USE LOWER FUNCTION

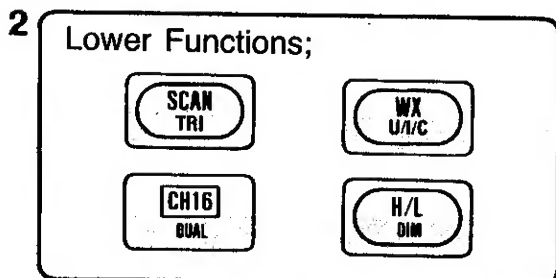

### SELECT LOWER FUNCTION

Press **FUNC** to select lower function.

"F" will flash for approximately six seconds.

The lower function can be accessed during this period.

### SELECT THE DESIRED DOUBLE FUNCTION BUTTON

Press the desired double function button within this period.

## HOW TO EXIT FROM LOWER FUNCTION

### EXIT THE DOUBLE FUNCTION

Press **FUNC** to exit the lower function access without waiting for six seconds.

# Receiving

## IMPORTANT:

Whenever your marine radio is turned on, keep the receiver turned to the calling distress frequency (CH16).

This listening watch must be maintained at all times the station is in operation (when you are not actually communicating), priority is given when selecting CH16.

### POWER ON AND ADJUST VOLUME

Turn the **POWER SWITCH** to the right and adjust the **VOLUME CONTROL** for comfortable listening level.

- Make sure "INTL" appears on the display (International mode).

### ADJUST SQUELCH

Adjust the **SQUELCH CONTROL** until the background noise disappears.

### CAUTION

Turning the **SQUELCH CONTROL** too far clockwise may mute weak transmissions.

## HOW TO SELECT THE DESIRED MODE

### SELECT WEATHER MODE

- (1) Press **WX (U/I/C)** to select Weather mode.
  - "WX" is displayed.
- (2) Press **CLEAR** to exit Weather mode then go to INTL, CAN or USA mode.

### SELECT INTL, CAN OR USA MODE

By pressing (**FUNC** then **WX (U/I/C)**), mode rotates as follows.

- "INTL" is displayed.
- "CAN" is displayed.
- "USA" is displayed.

## HOW TO SELECT THE DESIRED CHANNEL

### SELECT THE DESIRED CHANNEL

Press **UP** or **DOWN** to select a channel number of INTL, USA, CAN or WX mode.

- A channel number is displayed.

### SELECT CHANNEL 16

Press **CH16 (DUAL)** to select CH16 when you are in any mode.

- "16" is displayed.

# Transmitting

CH16 is used for emergency and calling purposes only. When contact is established on CH16, you must switch to an appropriate working channel for further communication.

1 Example;

FUNC

then

WX  
U/V/C

## SELECT THE DESIRED MODE

Select the desired operating mode.  
 (See P.14 HOW TO SELECT THE DESIRED MODE. Repeat steps 3 and 4)

2

CH16  
DUAL

INTL
16<sup>HI</sup>

## SELECT CALLING CHANNEL (CH16)

Press **CH16 (DUAL)** to monitor and initiate your call.

- "16" is displayed.

### SELECT TRANSMIT POWER

Press **H/L (DIM)** to select the desired output power.

- "HI" or "LO" is displayed.

#### NOTE

Low power is automatically set on channels 13, 17 and 67 in the USA mode, 15, 17 in the INTL and CAN mode. However, you wish high power especially on channels 13 and 67 in USA mode, hold this button down during transmission.

### START TALKING

- (1) Press **PTT SWITCH** to begin transmitting.
  - "TX" is displayed.
- (2) To start talking into the Mic using your normal voice level.
- (3) To receive an answer, release **PTT SWITCH**.

#### NOTE

When the PTT Switch is pressed and the channel number flashes, transmission is prohibited on that particular channel (receive only channel).

### SELECT OPERATING CHANNEL

Press **UP** or **DOWN** to select operating channel.

- After contact is made on the CH16, select the operating channel to communicate with the other party.

### FINISH COMMUNICATION

Press **CH16 (DUAL)** to keep watching on CH16 after finish communication.

# How to Use the Memory Function

You may store all channels which you use often, into memory. These channels can then be selected quickly using **UP** or **DOWN** in the memory mode. Any combination of INTL, USA, CAN and Weather channels can be stored into memory.

## STORING A MEMORY CHANNEL

1 Example;

	then	
<hr/>		
	or	

### SELECT THE DESIRE MODE AND CHANNEL

Select the desired programming channel. (See p.14 HOW TO SELECT DESIRED MODE AND CHANNEL. Repeat steps 3 to 6)

2

1 second

INTL

15

HI  
M

### STORE THE CHANNEL

- (1) Press **MEMORY** and hold for 1 second.
- "M" is displayed.
  - When you select a channel, if an "M" is displayed, it indicates that the channel has been stored into memory.

## ERASING A MEMORY CHANNEL

### SELECT THE CHANNEL TO ERASE

Select the channel you wish to erase using **UP** or **DOWN**.

- The channel number is displayed.

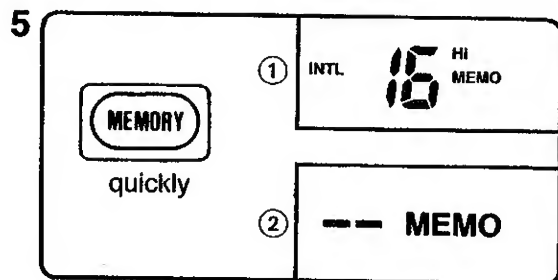

### PRESS MEMORY BUTTON

Press **MEMORY** and hold for 1 second.

- "M" is disappeared.

## SELECTING A MEMORY CHANNEL

### SELECT MEMORY MODE

- ① Press **MEMORY** quickly.
  - "MEMO" is displayed to show that it is ready to select a memorized channel.
- ② If no channels are stored, "-- MEMO" is displayed. (Press **WX (U/I/C)**, **CH16 (DUAL)** or **CLEAR** to exit this mode)

### SELECT MEMORY CHANNEL

- (1) Press **UP** or **DOWN** until the desired memory channel appears.
  - The memory channel number is displayed. If you want to erase the memory Channel, press **MEMORY** and hold for 1 second, displayed channel is disappeared then next memory channel is displayed.
- (2) The stored channel is displayed in succession as in the following example.

Example;

# How to Monitor CH16 and Present Channel (Dual Watch)

**DUAL WATCH:** Dual Watch for monitoring emergency CH16 while listening to another channel.

## ■ DUAL WATCH SIMULATION

- (A) Channel 16
- (B) Operating Channel

If a signal appears on CH16, the unit receives on CH16 until the signal disappears.

### SELECT THE DESIRED MODE AND CHANNEL

Select the desired (present) channel.  
(See p.14 HOW TO SELECT THE DESIRED MODE AND CHANNEL. Repeat steps 3 to 6)

### START DUAL WATCH FUNCTION

- (1) Press **FUNC** then **CH16 (DUAL)** to start Dual Watch function.
  - "DUAL" is displayed.
- (2) The unit monitors CH16 every few seconds.

### START TALKING

- ① Press **PTT SWITCH** to transmit on the present channel.
  - "TX" is displayed.
- ② To select CH16, press **CH16 (DUAL)** then press **PTT SWITCH** to transmit.

### EXIT THIS MODE

Press any buttons you wish to select.  
See p.28, ① to ⑥.

# How to Program into Memory for Triple Watch

---

### SELECT THE DESIRED MODE AND CHANNEL

Select the desired channel which you wish to store for the Triple Watch.

(See p.14 HOW TO SELECT THE DESIRED MODE AND CHANNEL. Repeat steps 3 to 6)

### PROGRAM THE TRIPLE WATCH CHANNEL

Press **FUNC** then **SCAN (TRI)** and hold for 1 second.

- You hear a beep then "►" is displayed. "►" means the selected channel has been programmed for Triple Watch.

### CHANGE THE PROGRAMMED CHANNEL

Select the desired channel to replace the programmed channel then repeat step 2. The displayed channel has been stored and the previously channel has been erased.

## ERASING THE PROGRAMMED CHANNEL

### ERASE THE TRIPLE WATCH CHANNEL

Press **FUNC** then **SCAN (TRI)** and hold for 1 second to erase the displayed channel which is programmed for Triple Watch.

- You hear a beep then "►" is disappear.

# How to Monitor CH16, Present Channel and Programmed Channel (Triple Watch)

**TRIPLE WATCH:** Triple Watch for monitoring emergency CH16 and programmed Triple Watch channel while listening to a third channel.

## ■ TRIPLE WATCH SIMULATION

- (A) Channel 16
- (B) Operating Channel
- (C) Programmed Triple Watch channel

If a signal appears on CH16 or programmed Triple Watch channel, the unit receives on CH16 or programmed Triple Watch channel until the signal disappears.

1 Example;

 then  1 second

### PROGRAM THE TRIPLE WATCH CHANNEL

Program the desired channel for monitoring.  
(See p.21 HOW TO PROGRAMMED INTO MEMORY FOR TRIPLE WATCH)

2 Example;

 then 

---

 or 

### SELECT THE DESIRED MODE AND CHANNEL

Select the desired (present) channel.  
(See p.14 HOW TO SELECT THE DESIRED MODE AND CHANNEL. Repeat steps 3 to 6)

3

 then  quickly

INTL **2**<sup>HI</sup> ►DUAL

### START TRIPLE WATCH FUNCTION

- (1) Press **FUNC** then **SCAN (TRI)** quickly.
  - After Programmed Triple Watch channel appears on the LCD for 1 second, "►DUAL" is displayed.
- (2) The unit monitors CH16, programmed channel and the present channel.

4

①  INTL **10**<sup>HI</sup> TX ►DUAL

②  INTL **16**<sup>HI</sup> ►DUAL

③  INTL **2**<sup>HI</sup> ►DUAL

### START TALKING

- ① Press **PTT SWITCH** to transmit on the present channel.
  - "TX" is displayed.
- ② To select CH16, press **CH16 (DUAL)** to transmit.
- ③ To select programmed channel, press **UP** or **DOWN** to transmit.

4 Example;

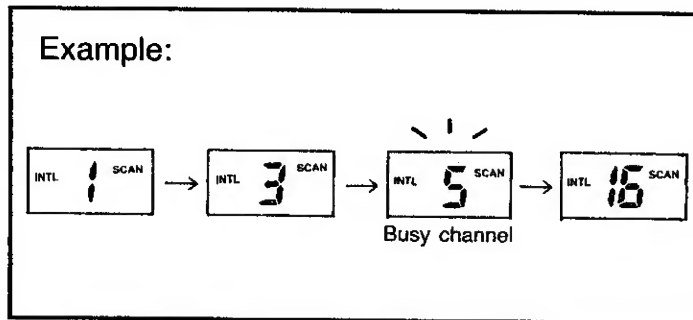

### EXIT THIS MODE

Press any buttons you wish to select.  
See p.28, ① to ⑥.

# Scan Information

## AUTO SCAN

Scans all channel  
International, USA, Canada and  
Weather channels.

## TIME OUT SCAN

Searching will start from a  
channel (on which a signal is  
received) to the next busy  
channel after a few seconds  
interval.

## DUAL WATCH SCAN

Scans all channels while  
watching CH16.

## TRIPLE WATCH SCAN

Scans all channels while  
watching programmed Triple  
Watch channel and CH16.

# Scan Operation

## AUTO SCAN

### START SCANNING

- (1) Press **SCAN (TRI)** quickly.
  - "SCAN" is displayed.
- (2) The unit will start scanning up from the displayed channel.
- (3) Scanning stops at a channel on which the unit receives a signal.
- (4) The channel number displayed will flash until the signal disappears.
- (5) The voice on the channel can be heard.
- (6) Press **SCAN (TRI)** to stop searching. (Refer to p.28)

## TIME SCAN

### START TIME-SCANNING

- (1) Press **SCAN (TRI)** and hold for 1 second.
  - "T-SCAN" is displayed.
- (2) Scanning pauses at a channel (on which a signal exists) for a few seconds.
- (3) The channel number flashes for that period.
- (4) The unit will continue scanning up.
- (5) Press **SCAN (TRI)** to stop searching. (Refer to p.28)

# Scan Operation (cont.)

## DUAL WATCH SCAN

### SELECT DUAL WATCH MODE

- (1) Press **FUNC** then **CH16 (DUAL)** to monitor CH16 at intervals of a few seconds.
  - "DUAL" is displayed.
- (2) The unit monitors CH16 and the present channel every few seconds.

### START SCANNING WITH DUAL WATCH MODE

- (1) Press **SCAN (TRI)** quickly.
  - "SCAN" is displayed and scanning will start.
- (2) The unit will alternate between CH16 and each channel sequentially scanned.
- (3) The scan stops then a signal is received and then the scan resumes after the signal disappears.
- (4) When you press **SCAN (TRI)** and hold for 1 second, "T-SCAN" is displayed then scanning will pause at a channel on which a signal is received for a few seconds and then the unit will continue scanning up.

## TRIPLE WATCH SCAN

### SELECT TRIPLE WATCH MODE

- (1) Press **FUNC** then **SCAN (TRI)** quickly.
  - "►DUAL" is displayed.
- (2) The unit will monitor CH16 and programmed channel at intervals of a few seconds.

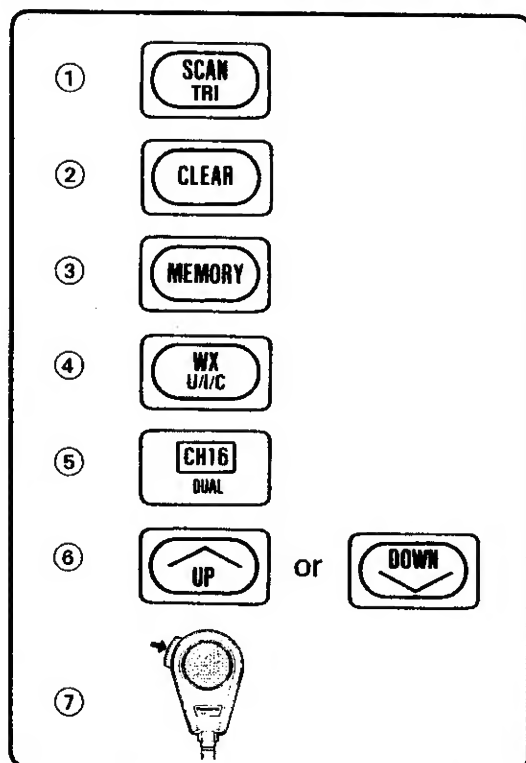

### START SCANNING WITH TRIPLE WATCH MODE

- (1) Press **SCAN (TRI)** quickly.
  - "SCAN" is displayed and scanning will start.
- (2) The unit alternates CH16 and programmed channel and each channel sequentially scanned.
- (3) The scan stops when a signal is received and then the scan resumes after the signal disappears.
- (4) When you press **SCAN (TRI)** and hold for 1 second, "T-SCAN" is displayed then scanning will pause at a channel on which a signal is received for a few seconds and then the unit will continue scanning up.

## HOW TO STOP SEARCHING AND ANSWERING A CALL

Select the one button to stop searching.

- ① Press **SCAN (TRI)** to select the displayed channel.
- ② Press **CLEAR** to go to USA, INTL or CAN mode.
- ③ Press **MEMORY** to go to Memory channel mode.
- ④ Press **WX (U/I/C)** to go to Weather channel mode.
- ⑤ Press **CH16 (DUAL)** to go to channel 16.
- ⑥ Press **UP** or **DOWN** to go to desired channel.
- ⑦ Press **PTT SWITCH** to answer a call on the receiving channel.

# How to Display the Last Channel when turned on

## LAST CHANNEL MODE

This mode will store and recall the last channel that was selected before the radio was turned off.

### MEMORY THE LAST CHANNEL MODE

- (1) Press **SCAN (TRI)** and **CLEAR** simultaneously while pressing them in turn the radio off.
- (2) Verify that the last channel appears on the LCD when the radio is turned on.

## CHANNEL 16 RECALL MODE

This mode will recall CH16 each time the radio is turned on.

### RECALL CHANNEL 16 MODE

- (1) Press **DUAL** and **H/L (DIM)** simultaneously while pressing them in turn the radio off.
- (2) Verify that CH16 appears on the LCD then the radio is turned on.

# Troubleshooting Guide

The following are brief descriptions of common problems caused by sources outside the unit. Should any trouble concerning the actual unit occur, please take the unit directly to an authorized Servicenter for qualified service.

## Problem

## Cause & Remedy

**Unusual difficulty in transmitting or receiving.**

- Check the antenna system (broken or shorted antenna cable, corroded or defective connectors.)
- Battery voltage may be low.

**No display and no sound is heard when the Power Switch is turned on.**

- Battery voltage may be low or dead.
- Power cord may be broken or shorted.
- Fuse or fuse holder located in the power cable may be corroded or unlocked.

**"TX" is not displayed when the PTT Switch is pressed in transmitting mode.**

- Microphone cord may be broken or damaged.

**Noise from ignition, refrigeration or power generating equipment interferes with the unit.**

- Consult an experienced radio technician who can locate and suppress electrical noise at its source.

## NOTES

The following conditions will cause the displayed channel to flash;

- Attempting to transmit on a receive only channel.
- When a signal on CH16 is received in Dual Watch mode.
- When a signal is received in an automatic scanning mode.
- When a signal on CH16 or Programmed Triple Watch channel is received in Triple Watch mode.
